Professional Summary

Full-Stack Software Engineer with **3+ years of experience** delivering software solutions across AI, Real Estate, Automotive Marketplace, Utility Billing, Compliance Management, Digital Identity, and Manufacturing domains. Skilled in developing scalable applications, streamlining business workflows, integrating third-party services, and supporting cloud-based production systems throughout the software development lifecycle.

Technical Skills

Programming Languages: JavaScript, TypeScript, Java, Python

Frontend Technologies: React.js, Next.js, Redux Toolkit, HTML5, CSS3

Backend Technologies: Node.js, Express.js, NestJS, Spring Boot, RESTful APIs, Microservices, WebSockets

Database Systems: MongoDB, PostgreSQL, MySQL, Redis

Cloud & DevOps: AWS EC2, Lambda, S3, API Gateway, Docker, NGINX, GitHub Actions, GitLab CI/CD

Development Tools: Git, Maven, Postman, Linux

Authentication & Authorization: JWT, OAuth2, AWS Cognito, Google OAuth

Professional Experience

Software Engineer, GTCSYS – Ahmedabad, India

Oct 2022 – Present

- Engineered enterprise-grade applications leveraging Node.js, NestJS, Java Spring Boot, React.js, and Next.js.
- Designed and implemented REST APIs, backend services, and business logic for both external and internal platforms.
- Utilized MongoDB, PostgreSQL, and MySQL for data modeling, query tuning, and performance optimization.
- Delivered secure authentication and authorization workflows using JWT, OAuth2, AWS Cognito, and Google OAuth.
- Integrated third-party platforms such as Stripe, Twilio, and Salesforce APIs into core systems.
- Participated in the design and development of microservice architectures and their deployment on AWS.
- Administered NGINX, SSL certificates, Linux-based servers, and production deployment environments.
- Worked closely with cross-functional teams throughout the SDLC, covering development, QA, deployment, and ongoing production maintenance.

Domain Experience

Artificial Intelligence Machine Learning Platforms

- Helped build AI-powered solutions that reduced manual effort in processing and analyzing large volumes of business documents.
- Improved information discovery by enabling intelligent search and automated document workflows for end users.
- Contributed to scalable processing pipelines capable of handling growing data volumes and evolving business requirements.
- Enhanced user experience through real-time updates, workflow automation, and faster access to relevant information.

Real Estate

- Delivered features that simplified property discovery, listing management, and customer engagement for buyers, sellers, and agents.
- Streamlined onboarding and transaction-related workflows, improving the overall customer experience on the platform.
- Supported business growth by improving operational efficiency through centralized dashboards and management tools.

Smart Building Management Utility Billing

- Automated utility billing and payment tracking processes, reducing manual administrative work for property managers.
- Improved visibility into utility consumption and operational performance through monitoring and reporting solutions.

Compliance Management Systems

- Simplified compliance verification and document management processes for businesses through workflow automation.
- Reduced manual follow-ups by implementing tracking and notification mechanisms for compliance-related activities.

NFC Digital Identity Solutions

- Enabled businesses and professionals to share and manage digital identities through modern contactless solutions.
- Improved customer engagement insights by providing analytics and interaction tracking capabilities.

Automotive Marketplace Vehicle Commerce

- Helped build platforms that made it easier for customers to browse, buy, and sell vehicles while simplifying inventory management for dealerships.
- Improved customer engagement and inquiry handling processes, enabling dealerships to manage leads more effectively.

Manufacturing Industrial Solutions

- Helped improve operational efficiency by automating manual business processes and streamlining workflow management.
- Enhanced data visibility and process tracking, enabling teams to make more informed operational decisions.

Key Achievements

- Contributed to the successful delivery of enterprise applications across five business domains, including AI, Real Estate, Utility Billing, Compliance, and Digital Identity.
- Built and maintained scalable backend services, integrations, and cloud-hosted applications supporting production business operations.
- Worked across the complete software development lifecycle, from requirement analysis and implementation to deployment, monitoring, and production support.

Education

Bachelor of Engineering (Civil Engineering)

Gujarat Technological University

2018 – 2022

CGPA: 7.35 / 10
